

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): An optical member in which a surface of an optical material is bonded to and covered with a transparent protective film having an outer surface roughness Ra of from 0.03 to 1 μm that does not substantially alter the transparent properties of the protective film, wherein the protective film comprises a protective base and an adhesive layer disposed on the protective base so that the protective base can be released together with the adhesive layer from the optical material.

2. (previously presented): The optical member according to claim 1, wherein the protective film is disposed on one surface of the optical material, and a separator is provided on an adhesive layer disposed on the other surface of the optical material so that the separator can be released from the adhesive layer.

3. (original): The optical member according to claim 1, wherein the optical material comprises a polarizing plate.

4. (previously presented): The optical member according to claim 1, wherein the optical material comprises a polarizing plate, and at least one of a retardation plate and a brightness enhancement plate.

5-8. (canceled)

9. (original): A liquid crystal display having an optical member according to claim 1.

10. (previously presented): The optical member according to claim 1, wherein the

protective film has an outer surface roughness Ra of from 0.04 to 1 μm .

11-16. (canceled)

17. (withdrawn): An optical member according to claim 3, wherein the polarizing plate has a transparent protective layer on one or both faces of a polarizing film.

18. (withdrawn): The optical member according to claim 17, wherein the protective film is disposed on one surface of the optical material, and a separator is provided on the other surface of the optical material via an adhesive layer.

19. (withdrawn): The optical member according to claim 17, wherein the optical material comprises at least one of a retardation plate and a brightness enhancement plate.

20. (withdrawn): The optical member according to claim 17, wherein the protective film has an outer surface roughness Ra of from 0.04 to 1 μm .

21. (canceled)

22. (withdrawn): The optical member according to claim 17, wherein the separator has an outer surface roughness Ra of from 0.05 to 1 μm .

23. (withdrawn): A liquid crystal display having an optical member according to claim 17.

24. (withdrawn): An optical member according to claim 17, wherein a reflecting layer having a fine undulating structure is disposed on the protective layer.

25. (withdrawn): An optical member according to claim 24, wherein the reflecting layer is formed by attaching metal directly onto the surface of the protective layer.

26. (withdrawn): A liquid crystal display having an optical member according to claim 24.

27. (previously presented): An optical member according to claim 1, wherein the protective film has an outer surface roughness Ra of from 0.05 to 1 μm .

Serial Number: 10/015,991

Group Art Unit: 2872

28. (previously presented): An optical member according to claim 1, wherein the protective film has an outer surface roughness Ra of from 0.06 to 1 μm .

29-35. (canceled)
